課程講義 (09-10)：健康風險評估  
Introduction to Health Risk Assessment

### • INTRODUCTION

- Assessment vs. Analysis; Risk Assessment vs. Risk Management
- Environmental Impact Assessment => Human Health Impact => Risk Assessment
- ‘*A Priori*’ Health Risk vs. ‘*Posterior*’ Epidemiological Survey
- Health Risk Assessment => Environmental Issues or Public Health Concerns
- 中科三期七星農場及中油三輕更新計畫環評爭議 => 《[健康風險評估技術規範](#)》
- Definition of Environmental Health Risk Assessment (<http://www.eh.org.au/documents/item/916>):  
“Risk assessment is the process of estimating the potential impact of a chemical, physical, microbiological or psychosocial hazard on a specified human population or ecological system under a specific set of conditions and for a certain time frame.”
- The scope of environmental health risk assessment can cover health impacts of
  - ⇒ Chemical pollutants and contaminants in air, water, soil and food
  - ⇒ Pathogenic microbiological contaminants in food and water
  - ⇒ Radiation sources
  - ⇒ Electromagnetic fields (EMFs)
  - ⇒ Climate and climate change
- Risk Assessment Steps
  - ⇒ Hazard Identification / Evaluation / Characterization
  - ⇒ Effects / Losses / Impacts Assessment
  - ⇒ Assessment of Occurrence Probability
  - ⇒ Characterization (NOT ‘*Quantification*’) of Risk
  - ⇒ Risk Communication and Risk Management

### EXHIBIT 2.2. OBJECTIVES OF RISK ASSESSMENT.

1. Balance risks and benefits. <ul style="list-style-type: none"><li>• Drugs</li><li>• Pesticides</li></ul>	EXHIBIT 2.3. BIOLOGICAL END POINTS. <ul style="list-style-type: none"><li>• Cancers</li><li>• Mutations</li><li>• Birth defects</li><li>• Reproductive toxicity</li><li>• Immunological toxicity</li><li>• Neurobehavioral toxicity</li><li>• Organ-specific effects</li><li>• Endocrine modulation or disruption</li><li>• Ecosystem effects</li></ul>
2. Set target levels of risk. <ul style="list-style-type: none"><li>• Food contaminants</li><li>• Water pollutants</li></ul>	
3. Set priorities for program activities. <ul style="list-style-type: none"><li>• Regulatory agencies</li><li>• Manufacturers</li><li>• Environmental and consumer organizations</li></ul>	
4. Estimate residual risks and extent of risk reduction after steps are taken to reduce risks.
