From research to recovery

Bioengineer Jeffrey Chalmers and his Ohio State colleagues are cancer cell sleuths. The devices they've developed to detect head, neck, breast, and other cancers have earned eight patents, created jobs, attracted multimillion dollar funding, and have the potential to save lives. Their medical invention is just one example of how Ohio State innovation bolsters the state's economy.

Thompson Library: Extreme makeover

The next time you're on campus, stop by Ohio State's "new" old library. The dark stacks are now overlooking a light-filled atrium. Originally built in 1914, the renovated library is a dreamscape for scholars, featuring group-study spaces to a majestic reading room with a 30-foot ceiling.

Dental history

Dentistry has come a long way since Ohio State's dental school in 1914--and it now takes twice as long as it used to take to earn a dental degree. The namesake building--the Postles--have helped make earning a dental degree a little less painful.

Eat right to fight flu

Cover mouth when coughing? Check. Wash hands frequently? Check. Besides the basics, what do you do to keep your immune system strong during flu season? Experts at OSU Extension offer diet tips to stay healthy.

Buckeyes on break

Alex Hughes studied bears in Yosemite National Park. Niraj Shah wrestled a bear market as a bank manager in New York City. Erin Reilly-Sanders traveled in a van and finished a year-long goal of reading 100 books. And a student lived on a solar-powered home for the OSU Solar

O-H-I-O: Buckeyes to the bone

Researchers in Ohio State's Biodynamics Laboratory created a "fat-f
Halloween version of O-H-I-O with biomechanical software designed
illustrate spinal force.
